

Guidance document for processing PM-JAY packages

Lid surgeries

Procedures covered: 6

Specialty: Ophthalmology

Procedure name	HBP 1.0 code	HBP 2.0 code	Package price (INR)
i. Ptosis Surgery	S300019	SE001A	8,000
ii. Entropion correction	S300034	SE002A	6,600
iii. Ectropion correction	S300035	SE003A	6,500
iv. Lid Tear Repair	S300038	SE004A	5,000
v. Lid Abscess Drainage	New Package	SE005A	3,000
vi. Lid Tumor excision + Lid Reconstruction	S300022	SE006A	10,000

ALOS: 1 Day

Minimum qualification of the treating doctor:

Essential: MD/MS/ DNB/ PG Diploma/ equivalent (in Ophthalmology)

Special empanelment criteria/linkage to empanelment module: None

Disclaimer:

For monitoring and administering the claim management process of **Lid surgeries**, NHA shall be following these guidelines. This document has been prepared for guidance of PROCESSING TEAM and TRANSACTION MANAGEMENT SYSTEM of AB PM-JAY for the claims of procedures mentioned above. The hospitals can also refer to this document so that they have the insight on how the claims will be processed. However, this document doesn't provide any guidance on clinical and therapeutic management of patient. In that respect the hospitals and physicians may refer to other relevant material as per the extant professional norms.

PART I: GUIDELINES FOR CLINICIANS AND HEALTHCARE PROVIDERS

1.1 Objective:

The purpose of this section is to act as a guidance & a clinical decision support tool for the clinicians in deciding the line of treatment, plan clinical management of patient and decide referral of cases to the appropriate level of care (as required) for treatment of patients under PMJAY and selection of corresponding Health Benefit Package.

It will also serve as a tool for hospitals to determine and submit the mandatory documents required for claiming reimbursement of health benefit package under PMJAY.

1.2 Clinical key pointers:

Proceed for Lid Surgeries only if diagnosis made is backed by clinical signs, symptoms, ophthalmic examination and does not respond to conservative medical therapy. In Lid tumor excision the surgical specimen should be sent for histopathology, if lesion is atypical.

Procedure name	Description	Etiology/ Risk factors	Signs & Symptoms
i. Ptosis Surgery	Drooping of upper eyelid over the eye	Congenital/ Acquired (aging/ trauma/ post another eye surgery)	Dropping of upper eyelid over the eye; vision problem such as amblyopia/ astigmatism
ii. Entropion correction	Inward turning of the eyelid margin and appendages; usually of the upper eyelid	Usually seen in elderly/ congenital is rare	Abnormal position of the eyelid; Foreign body sensation, redness, tearing, discharge, dry eye; Corneal / conjunctival damage/ ulcer/ perforation
iii. Ectropion correction	Outward turning of the eyelid margin and appendages; usually of the lower eyelid, but may also be of upper eyelid	Elderly/ Trauma/ prior eyelid surgery/ inflammatory skin disease of the eyelid/ long term use of eyedrops congenital is rare	Abnormal position of the eyelid/ tearing, irritation/grittiness/foreign body sensation, red eye, and mucoid discharge.
iv. Lid Tear Repair	Partial- or full-thickness defects in the eyelid	Usually happens following a trauma to the face and eye	Erythema, edema, or tissue disruption around the eyelid or surrounding structures; Pain, irritation, bleeding, drainage from the eyelid / surrounding structures; distorted vision
v. Lid Abscess Drainage	Lid abscess/ styel hordeolum is a small, red, painful lump that grows from the base of eyelash/ under the eyelid	Bacterial infection (Staphylococcus)	Painful small red lump on the eyelid edge, watery eyes, usually affecting one eye; vision is generally not affected
vi. Lid Tumor excision + Lid Reconstruction	Abnormal pre-malignant/ Malignant growth on the eyelid	Chronic Ultraviolet light/ sun exposure; Basal cell; squamous cell; sebaceous gland; melanoma	Abnormal lesion / lump on the eyelid confirmed as benign/ malignant on Excision biopsy

1.3 Mandatory documents- For healthcare providers

Following documents should be uploaded by the concerned hospital staff at the time of pre-authorization and claims submission:

Mandatory document	Ptosis Surgery	Entropion correction	Ectropion correction	Lid Tear Repair	Lid Abscess Drainage	Lid Tumor excision + Lid Reconstruction
i. At the time of Pre-authorization						
b. Clinical notes	Yes	Yes	Yes	Yes	Yes	Yes
c. Admission Notes	Yes	Yes	Yes	Yes	Yes	Yes
d. Clinical Photograph of the affected eye	Yes (Photograph in primary position & lateral gazes)	Yes	Yes	Yes	Yes	Yes
ii. At the time of claim submission						
a. Detailed Discharge summary	Yes	Yes	Yes	Yes	Yes	Yes
b. Operative/ procedure notes	Yes	Yes	Yes	Yes	Yes	Yes
c. Histopathology/ microbiology report of host tissue	No	No	No	No	Yes	Yes

PART II: GUIDELINES FOR PROCESSING TEAM

PART III: GUIDELINES FOR IT

3.1 Objective: To enable setting up of cross check mechanisms/rule engines within the IT platform (TMS) to ensure compliance with STGs and to prevent fraud / abuse of the Health Benefit Package.

3.2 Below mentioned are the scenarios where a provision would be built in TMS for pop-ups:

- a. In case of lid tear repair- Is there a history of trauma to the face/ eye? Yes
- b. In case of lid abscess drainage, have conservative methods of management tried and failed/ not indicated? Yes, pl specify.

Till the time the functionality is being developed, the processing doctors shall check the above manually.
